

COHERENT SPACES

Connect with WISH

World Integrity Space Harmonizer

The logo on the Coherent Spaces website has been supercharged with the World Integrity Space Harmonizer and although it is not near as powerful as the WISH itself, it is a great starting point for those wanting to get a small taste of its energy.

SAMPLE THE ENERGY

Simply print off a few copies of the logo and place them in the rooms of your space. You can also place one in your car, in your wallet or slide it in your pocket to carry with you. You can copy and print the small logo above or the 8x8 logo on the last page of this document.

For those who are sensitive, you will notice that the logo alone can start to calm your space and begin to create coherence. Others notice that there is a lot of information in the logo's star. The logo is by no means a substitute for the WISH, but it is a means to start connecting to its energy while you wait for yours to be delivered.

Please note that it is better to print off the logo than to pull it up on our website via phone, tablet or computer as your devices can minimize or interfere with the effects available through the logo.

FUN FEEDBACK SO FAR

I had the Coherent Space logo printed out and sitting on our kitchen table.

Sapphire said while holding the paper, (Sapphire is 14 year old highly sensitive child)

“It’s Magnificent”

“It’s a message for the people”

“It’s calling the people”

~ Infinity and Sapphire

I placed a printed out logo in my grandson’s backpack after he stated he was having a hard time at school. That day he came home saying he had a better day and said the only thing better would be if they did not have to wear masks. He carried the logo for two more days and mask mandates were dropped.

~Suzy

Sharing an insight around the logo in a pocket:

The other day, I printed off a logo for my mom, and Jaden (my son who is diagnosed with high functioning autism)

Jaden and my mom put their logo in their pockets and took off for the day.

My Mom, who owns a daycare, had a better day and was able to think through her thoughts and have time to answer all the questions she receives in a day with a lot more clarity and ease. Jaden works for my mom in the kitchen.

Jaden is the sole person in the kitchen, cook and dishwasher. Jaden fixed and served all 52 kids, breakfast, lunch and snack on time. Did all the dishes, prep and cleanup. He helped another department with their dishes and had the health inspector show up and passed their inspection with ease. In addition he helped teachers where needed during the day. He attributed his success to the logos in his pocket.

~ Mom and Jaden
